BCG MATRIX — PRODUCT CATEGORY ANALYSIS

Relative Market Share vs Market Growth Rate

ROI MODEL — RETURN ON INVESTMENT ANALYSIS

Category-level ROI derived from Revenue, Cost of Goods, and Profit data

ROI Formula: $\text{ROI (\%)} = (\text{Net Profit} \div \text{Total Revenue}) \times 100$ | Profit Margin = Net Profit ÷ Revenue

Category	Revenue (\$)	COGS (\$)	Net Profit	ROI %	Top City
Electronics	\$944,700	\$639,700	\$305,000	32.3%	Bangalore 559u
Home Care	\$467,250	\$332,250	\$135,000	28.9%	Pune 549u
Personal Care	\$463,200	\$330,200	\$133,000	28.7%	Mumbai 549u
Grocery	\$302,500	\$225,000	\$77,500	25.6%	Chennai 530u
Clothing	\$740,500	\$525,500	\$215,000	29%	Chennai/Pune 521u
TOTAL / AVG	\$2,917,950	\$2,052,650	\$865,500	29.67%	Electronics leads

Highest ROI: Electronics 32.3%

Lowest ROI: Grocery 25.6%

Overall ROI: 29.67%

COGS estimated as Revenue – Net Profit. ROI = Net Profit ÷ Revenue × 100

STRATEGIC RECOMMENDATIONS

01

Replicate Success

Deploy Bangalore's Electronics strategy (559 units / 32.3% ROI) in Pune to recover the 78-unit deficit. Replicate shelf planogram and staffing model.

02

Inventory Correction

Reduce Clothing shelf space in Delhi (469 units, 29% ROI) and pivot toward Personal Care which delivers consistent 28.7% ROI across all 6 cities.

03

Targeted Bundling

Cross-sell Electronics alongside Pune's Home Care (549 units) to lift Electronics ROI from current 47K profit. Bundle promotions can raise combined margin by ~3–5%.
